iinovis GmbH

**iinovis**

# Company Profile

iinovis

# Company Profile

## Overview

### iinovis Key Stats

**~25 mio.**

EUR in turnover  
(2024)

**+50 years**

of experience in  
engineering and  
manufacturing

**~300**

employees  
(2024)

**100%**

Shareholder  
Accursia Capital  
GmbH

- 3 development sites in Germany
- 2 production sites
- 1 test center in Spain
- 1 BCC development center

### Locations

### Business Divisions

Vehicle development

Motorcycle  
development

Simulation

Electrics /  
Electronics  
& eDrive

Testing

Prototyping /  
Small series

Wiring & Vehicle  
systems

### Customers

# Company Profile

## Overview

### What customers can expect from us:

- Comprehensive service portfolio (incl. tests, prototypes, small series)
- Full project responsibility and scalable resources
- Cost efficiency due to BCC support (India)
- Know-how of new technologies

#### Vehicle development

- Vehicle body derivatives and body-in-white development
- Storage system integration
- Complete vehicle integration and process management
- Complete system engineering and concept development
- Seat development

#### Motorcycle development

- Concept and series development
- Project management
- Body development
- Mechatronics & Light
- Powertrain & Chassis
- Electrics & Electronics
- Release & Procurement
- Test and test bench support

#### Simulation

- Fuel cells
- Battery systems
- HV Wiring harness / Power electronics
- Powertrain
- Complete Vehicle / Motorcycle
- Interior / Seat systems
- Lighting
- Aerodynamics
- Material modelling

#### Electrics / Electronics & eDrive

- Battery system development
- Advanced E/E architecture
- eDrive integration
- Wiring harness LV / HV
- Hydrogen technology for fuel cells and combustion engines
- Electronics development

#### Testing

- Airbag testing
- Environmental testing
- Endurance and strength testing
- Test bench for fuel cell humidifiers
- Road testing (complete vehicle and brakes) in Antas/Spain

#### Prototyping / Small series production

- Prototype and test vehicles
- Vehicle assembly
- Body construction
- Motor sports and safety
- Small series production of vehicles and components
- Modelling
- Motorcycle

#### Wiring & Vehicle systems

- Wiring harness production
- Test bench and HIL setup
- Software testing and applications
- Early and dynamic commissioning
- Automated testing of wiring systems
- Complete vehicle assembly and commissioning

**Local: proximity to customer sites / prototype construction / small series expertise**

# For a sustainable Future

iinovis

It is of utmost importance to us to embed sustainability in all our economic targets, strategies and activities and, thus, meet our ecological and social responsibility. Hence, we take all appropriate measures to minimize the impact of our operating activities on the environment and society.

- We promote sustainable economic growth.
- Our corporate culture is based on sustainability. Taking account of the climate change and the general scarcity of resources, we make all efforts to use natural resources in a responsible and efficient way.
- We make a significant contribution to the environment and society by reducing the social and economic footprint of technological developments.
